SUMMARY OF QUALIFICATION

- Senior Full Stack Developer with 7+ years of experience specializing in designing scalable microservices, cloud architecture(AWS/GCP), and high performance applications. Proven track record of transitioning monolithic to modular, domain driven system architecture.
- Highly motivated with superior analytical, organizational, communicational skills and quick learner.

EDUCATION

Concordia University
Masters in Software Engineering, May 2020

University of Delhi
Bachelor of computer science
Graduated: Jun 2017

SKILLS

Programming
•JavaScript •Typescript •C++ •Java •Node.js •GraphQL •AJAX •MongoDB •SQL •PostgreSQL •HTML5 •CSS3.

Libraries and Framework
•React.js •React native •Redux.js •Express.js •JQuery •Bootstrap •Handlebars.js •Redux Saga •Socket.io •Fastify

Miscellaneous
•Aws lambda •Step function •SQS •SNS •API Gateway • DynamoDb •EventBridge •Kinesis •Athena •S3 •IAM •Kubernetes •Helm Charts •Apollo •Neo4j •Git •OOPS •Redis •Docker •DataDog •Sentry •JSON •CircleCI •OAuth2.0 •TDD •Heroku •Rest APIs •Jenkins •LaunchDarkly •SonarQube •Jira •Postman •GCP •ESLint •Confluence •LucidChart •Claude •Cursor •Gemini

Soft Skills
•Teamwork • Leadership

EXTRAS

2017 Vice President
Association of Computer Enthusiasts
2016 General Secretary
Association of Computer Enthusiasts
2014 Volunteer
University Placement Cell

AWARDS

University of Delhi
2017 Student of the year
2017 Best Paper Presentation

WORK EXPERIENCE

Senior Software Developer | ParagonERP (May,25, Present)

- Architected and built core platform libraries(IAM, logging, error-handling) adopted across 15+ microservices, improving consistency, security, and developer efficiency by reducing boilerplate code by 30% and accelerating feature delivery time across engineering teams.
- Architected and delivered domain-driven microservices(User, Product, Inventory) enabling the platform to shift from monolith to modular, customer configurable product offerings.
- Elevated engineering quality by implementing SonarQube and Opentelemetry, driving standards, leading code reviews, mentoring peers, and shaping architectural and design decisions.
- Technologies: Typescript, Nodejs, PostgreSQL, RabbitMQ, Redis, Ory Hydra, React, Redux, Docker, Kubernetes, GCP, Hexagonal architecture, domain-driven design etc.

Software Developer 3 | SSENSE (Oct,22– May,25)

- Engineered and scaled high-throughput inventory service supporting stock transfers, warehouse tracking, and fulfillment operations.
- Architected serverless workflows using AWS Step Functions and EventBridge, achieving 99.9% reliability for automated inventory sync processes.
- Designed and Presented BPMN architecture diagrams, implementing AWS infrastructure using cloud formation.
- Wrote testable, efficient and reusable code majorly in Typescript suitable for CI/CD, that respected best practices and development standards.
- Technologies: AWS lambda, Step function, SQS, SNS, S3, API Gateway, Event Bridge, Kinesis, DynamoDb, Nodejs, Typescript, Inversify, Dependency injection, Datadog, Jest, React, Redux, Okta, Lucidcharts, Launchdarkly, Dockers, Jira, GitHub.

Full stack developer & Software Engineer | Sentiance & Aaqua (Jun,20– Sep,22)

- Developed a scalable social media mobile application with an administrative web dashboard. Created executors i.e., cypher queries to access the graph database and resolvers i.e., GraphQL API to communicate between Java services, Database and Front-end. Worked on creating chat application from scratch using sendbird and getStream chat provider. Translated UI designs from Figma to code, maintained 100% test coverage and end-to-end testing.
- Technologies: React-native, React, Redux, Typescript, NodeJS, Koa, Apollo GraphQL Client & Server, Neo4j, Sentry, Nx, Jest, Storybook, Detox, Cucumber, Figma, Sentry, Dockers, Bitbucket, Git, CSS & styled components.
- Participated in daily standups and bi-weekly ceremonies (Agile), performing daily cross-team code reviews and working 100% remotely in international team.

Full stack developer | Definitechs Inc. District 3, Montreal, Canada (Mar–Jun,19)

- Designed, developed and deployed the backend and frontend of the product. Collaborated with AI developer to design and develop services required for up and running the company's AI Engine on cloud. Technologies: Node.js, MongoDB, React.js, Redux, Docker, AWS etc. Designed and coded application components in an Agile environment by sharing knowledge with and mentoring team members in the areas of expertise.

Full stack developer | Coding Ninjas, New Delhi, India(Feb,2017– July, 2018)

- Developed and maintained front-end using React.js components, Forms, Events, Router and Redux. Worked on Back-end using Node.js, Express.js and MongoDB. Created Rest APIs for interaction between server and client and used OAuth 2.0 service.
